STAY DRY, KEEP COOL

FABRIC THAT KEEPS YOU COOL

A special high-tech finish allows the garment to breathe, while transporting moisture away from the body. The quick-dry effect reduces post-exercise chill, making garments ideal for sports and active wear and leaving the wearer feeling cool and dry.

SOFT COMFORT

The finish leaves the fabric with a soft hand and reduces static cling.

LASTING COOLNESS

You stay dry and cool—your clothes stay looking new. The effects last as long as the garment, wash after wash.

INNOVATIVE EFFECT FOR A SUSTAINABLE ENVIRONMENT

Quick dry and easy stain removal properties allow shorter washing and drying cycles, reducing consumption of energy, water and detergent.

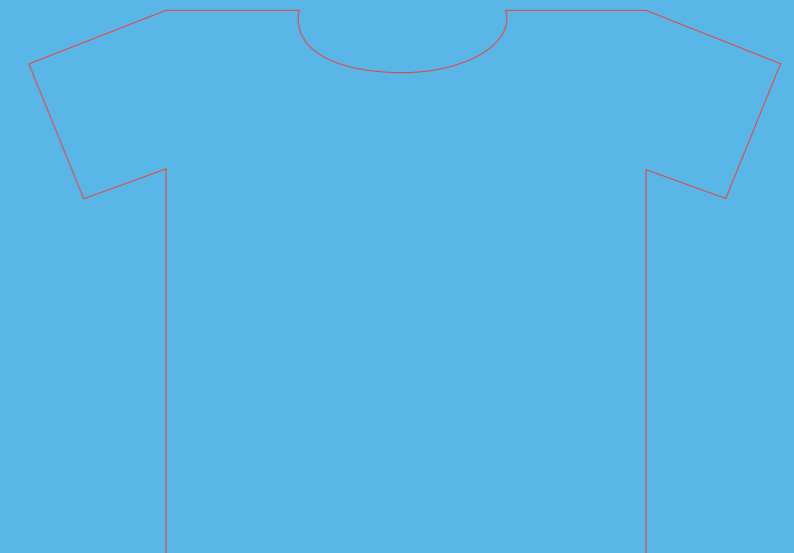

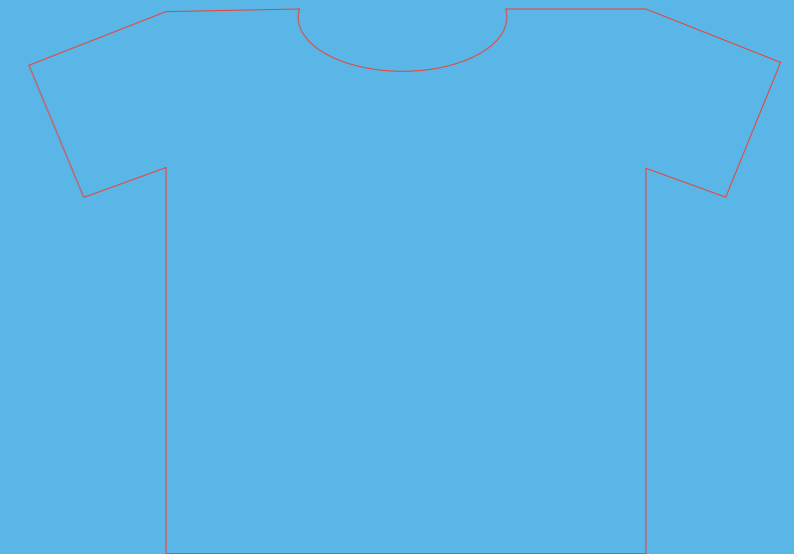

HOW IT WORKS

Fabrics can act as a barrier to the evaporation process and create humid conditions between the skin and the garment. Thanks to high-tech moisture management and quick-dry properties created by the natural microclimate of the garment, water vapor is rapidly transported away from the body and spread over a wide area, accelerating evaporation. Synthetic fibers attain the breathability and comfort of cotton.

- Fabrics: suitable for PES, PA, CO and their blends
- End uses: active wear, T-shirts, underwear, socks, bed sheets, towels

TEST IT!

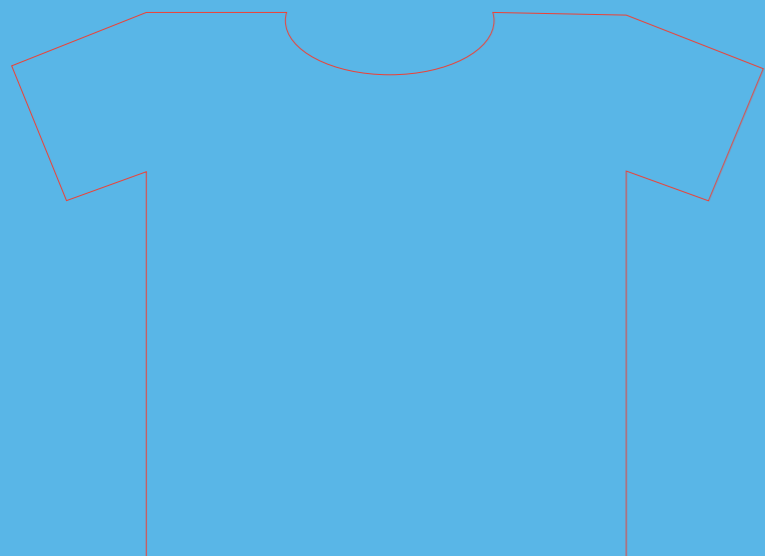

- Pour a few drops of water onto the High IQ® Cool Comfort sample:
 - ▶ see how the moisture is instantly absorbed and rapidly distributed.
- Pour a few drops of water onto the untreated sample:
 - ▶ see how wet spots remain on the fabric, because it takes much longer to absorb the moisture.
